# SUPER LUTEIN MIRTOPLUS

The "golden formula" of SUPER LUTEIN combined with antioxidant Mirtogenol®

## Pycnogenol®

*French maritime pine bark extract*

Pycnogenol® is a natural botanical ingredient extracted from the bark of French maritime pine trees that are 30-50 years old. It has 170 times the antioxidant power of Vitamin E, 340 times that of Vitamin C, and over 40 types of flavonoids including procyanidin, catechin, and taxifolin. Pine bark extract has historically been consumed in Europe for beauty and health.

## Mirtoselect™

*Bilberry extract*

Mirtoselect™ is a proprietary bilberry extract produced by Indena of Italy from freshly ripened bilberry fruits harvested between July and September. Bilberry is a wild species of blueberry, carefully selected from over 150 blueberry species. It is a fruit-bearing shrub with strong vitality. Fresh bilberries contain about 4 times the anthocyanin (a type of polyphenol) of blueberry.

SUPER LUTEIN MIRTOPLUS is not simply the goodness of SUPER LUTEIN with added Mirtogenol®. The synergistic combination of water-soluble antioxidant Mirtogenol® and fat-soluble antioxidant lutein hails a breakthrough in Naturally Plus' product development.

Mirtogenol is a registered trademark of Horphag Research and Indena S.p.A.

Naturally Plus has been recognised by Kemin Industries, Inc. (USA) for having the world's No. 1 transaction volume of FloraGLO™ Lutein in the MLM industry (as of September 2012).
